

Web Development

Custom design and development for internet, intranet and extranet sites

We match our creative minds with technical expertise to ensure that form follows function – that each website not only looks great, but performs even better. We constantly balance and consider all key aspects of each web project: design, coding, content, navigation, interactivity, accessibility, usability and search engine optimization. With all this talent in-house, Silver Oaks is uniquely qualified for your custom web development needs.

Talents and Expertise

- Web design and development
- SEO-focused, standards-compliant coding
- Custom applications
- Multimedia components
- Content management tools
- Site analysis and consulting
- eCommerce
- Mobile
- Advergaming
- eMarketing integration

Creative Process

No matter how big or how small your web project is, we follow the same steps. This is reassuring for web savvy clients as well as helping clients who are working through their first site with us understand what's involved.

Tools and Technologies

HTML, XHTML, CSS, C#, PHP, ASP.NET, SQL Server, XML, AJAX, JSON, Java, JavaScript, JQuery, Flash

Silver Oaks dedicates time to investigate new software and technologies to see how they affect our capabilities and clients. We also continually compare browser features and compatibility, anticipating when old browser versions will be phased out, and developing for new browser releases and scalability.

Get Started

1. Call and ask to speak to one of our sales representatives – **309.797.9898**
2. Email us your questions or send information on your next project – **info@silveroaks.com**
